

## Description

Membranesystem is a system that includes bituminous materials that both prevents water leaks as well as insulates the substrate from external heat. Some of its main uses are: Exposed roofs, retaining walls, basements below-ground structures, flat roofs under protective layers of ballast and balconies and terraces under tiles.

## Products Used

- TERRAZZO TILES
- BLD GEOTEXTILE
- POLYSTYRENE BOARD
- BLD SHEIALD MEMBRANE
- BLD WP
- FOAM CONCRETE TO SLOPE
- CONCRETE ROOF SLAB

## Advantages

- Fully-bonded system
- Withstands extreme weather
- conditions
- Ease of maintenance
- Exceptional mechanical properties
- High mechanical and puncture
- resistance
- High ouncture resistance

# ORIGINAL SYSTEM
